1 Application Scenario

When IAM version has perform the upgrade from 11.8 to 12.0.18, to further improve the data synchronization, we need to upgrade the External Report Center to latest version.

Requirement condition:

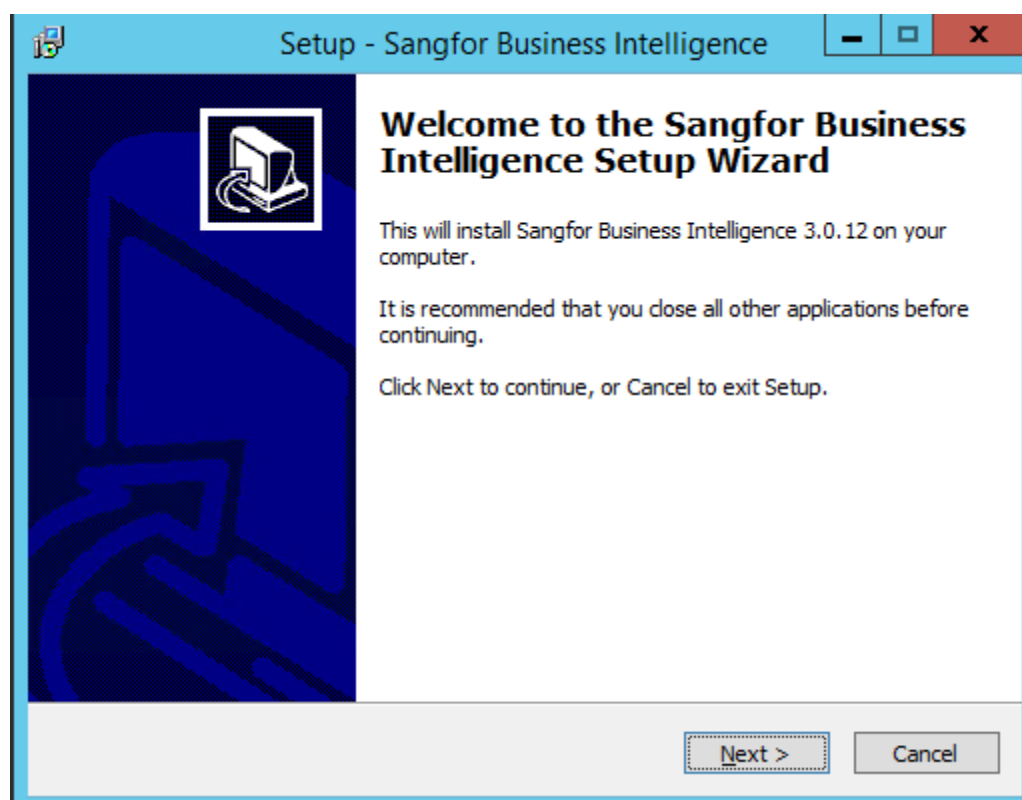

1. Prepare a External Report Center with 12.0.8.

2 Configuration Step

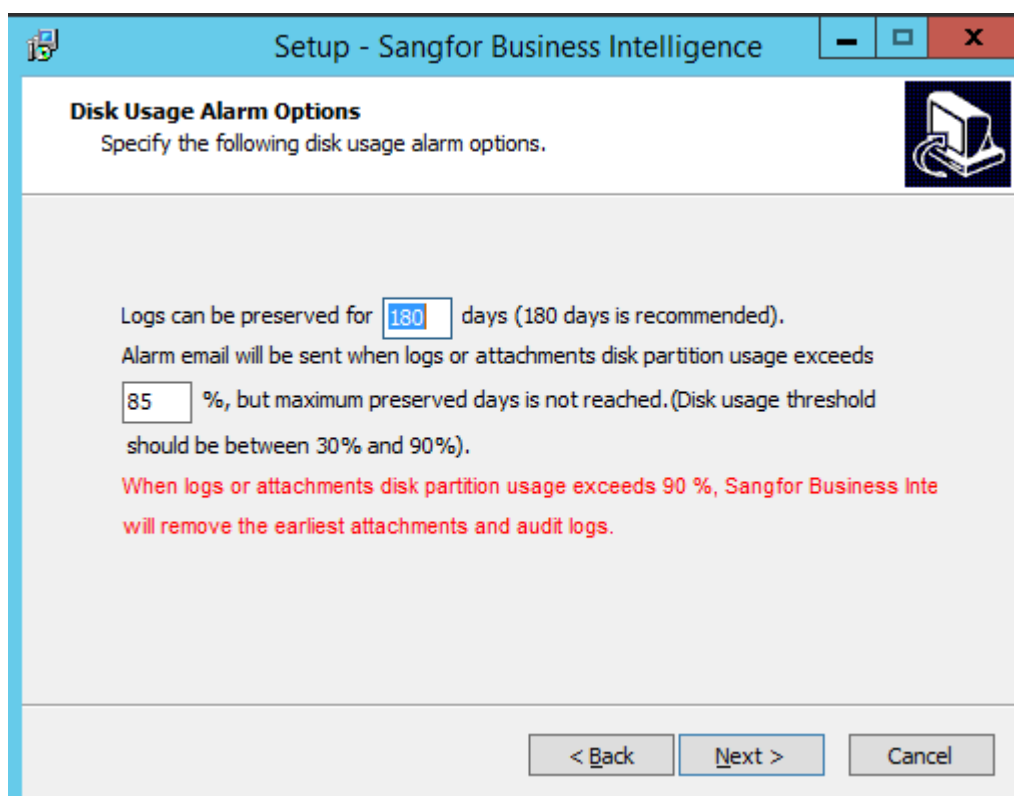

First Step: You able to download the Sangfor Business Intelligence 3.0.12 upgrade package at Sangfor community (community.sangfor.com), the download link as :

[http://download.sangfor.com/Download/Product/IAM/IAM12.0.40/BusinessIntelligenceUpdate_3.0.12_BI\(20191010\)_eng.zip](http://download.sangfor.com/Download/Product/IAM/IAM12.0.40/BusinessIntelligenceUpdate_3.0.12_BI(20191010)_eng.zip).

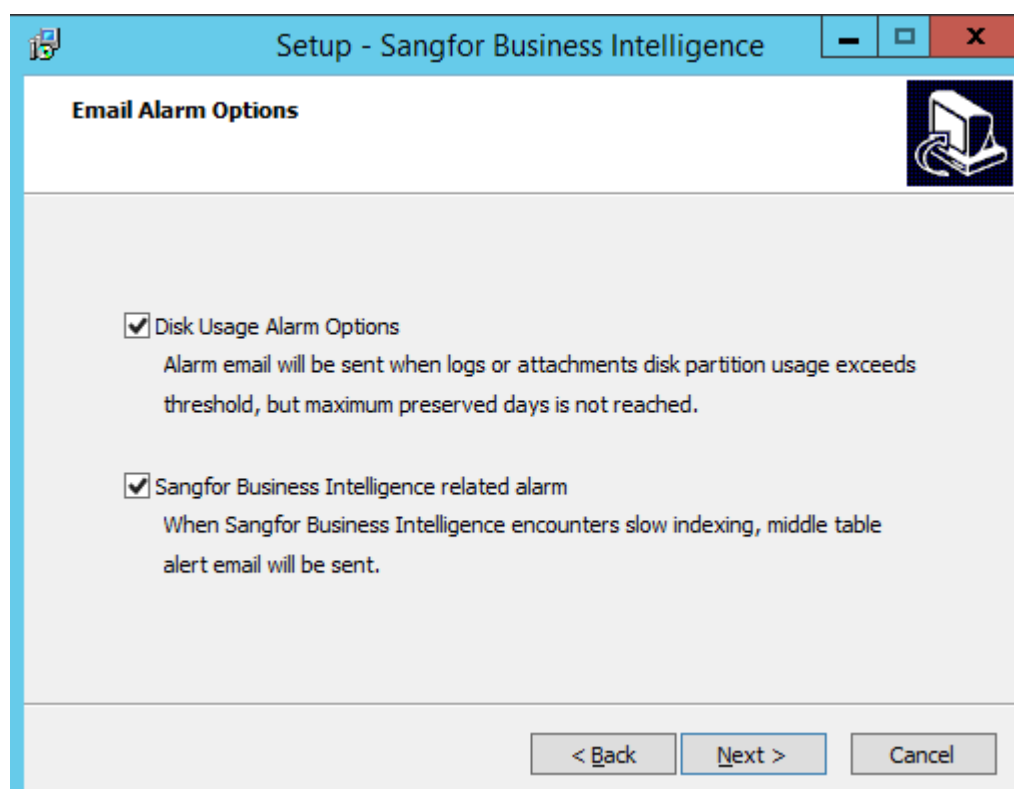

Second Step: Extract the zip file and run the BI application on the External Report Center server.

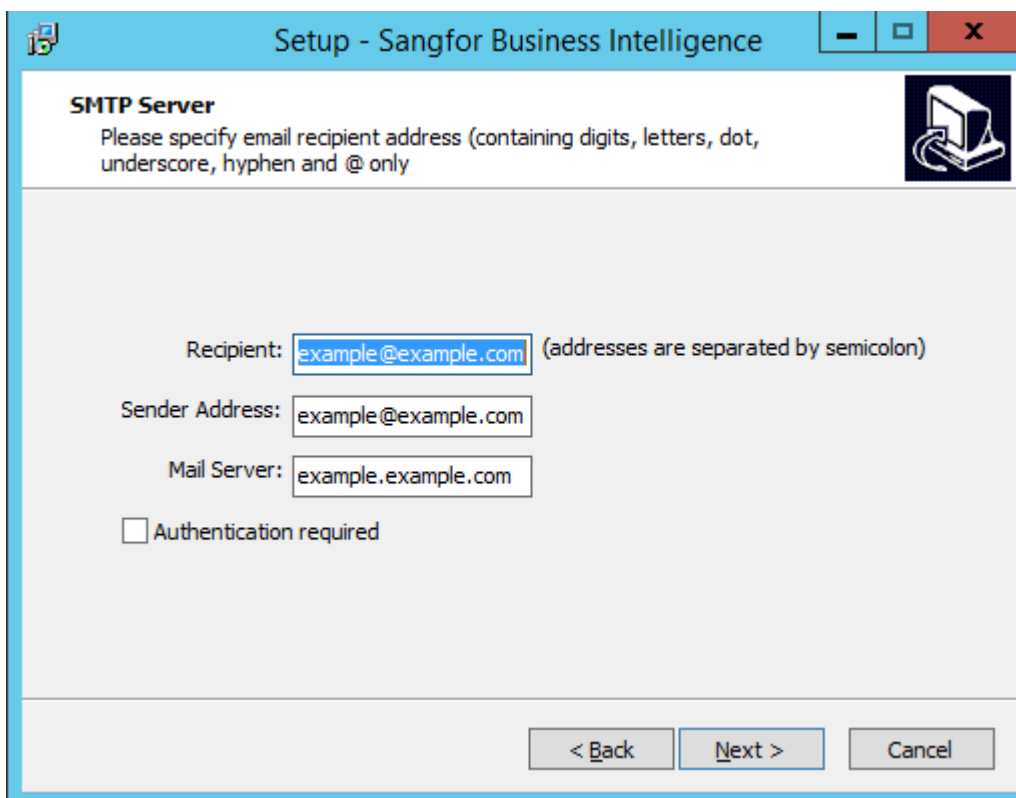

Follow the default setting, click on “Next” to continue.

Here is the Email Alarm option, you may click on "Next" to continue.

SMTP Server

Please specify email recipient address (containing digits, letters, dot, underscore, hyphen and @ only)

Recipient: (addresses are separated by semicolon)

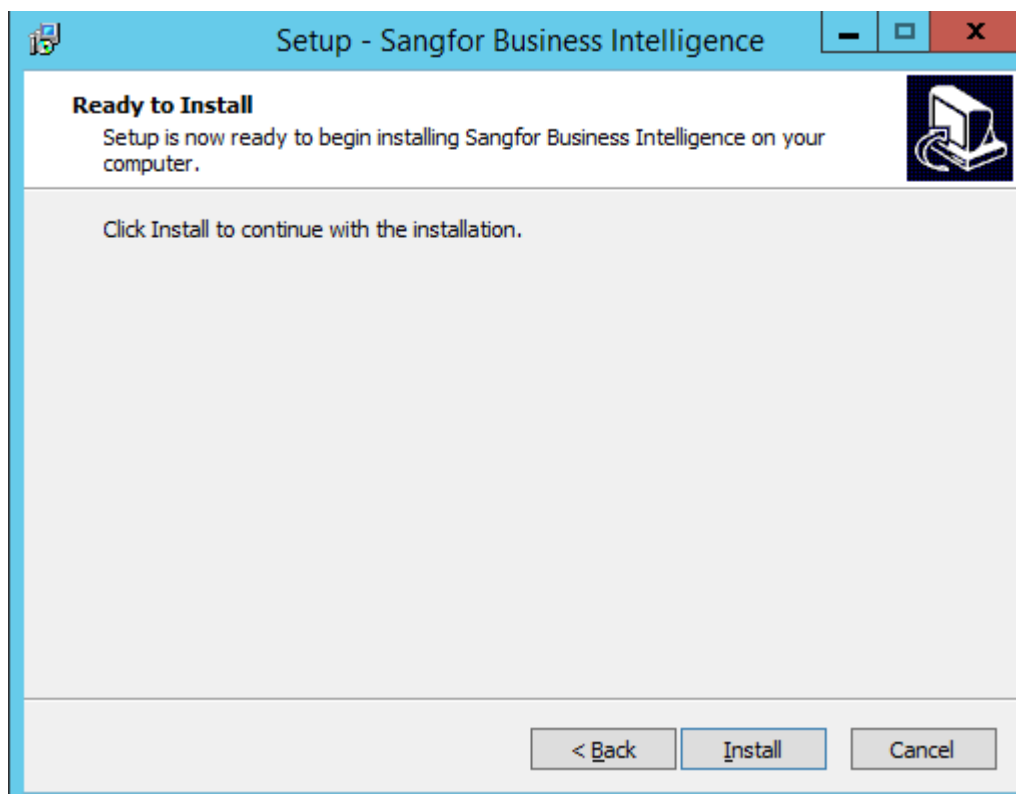

Sender Address:

Mail Server:

☐ Authentication required

< Back Next > Cancel

You may click “Install” to proceed the upgrading.

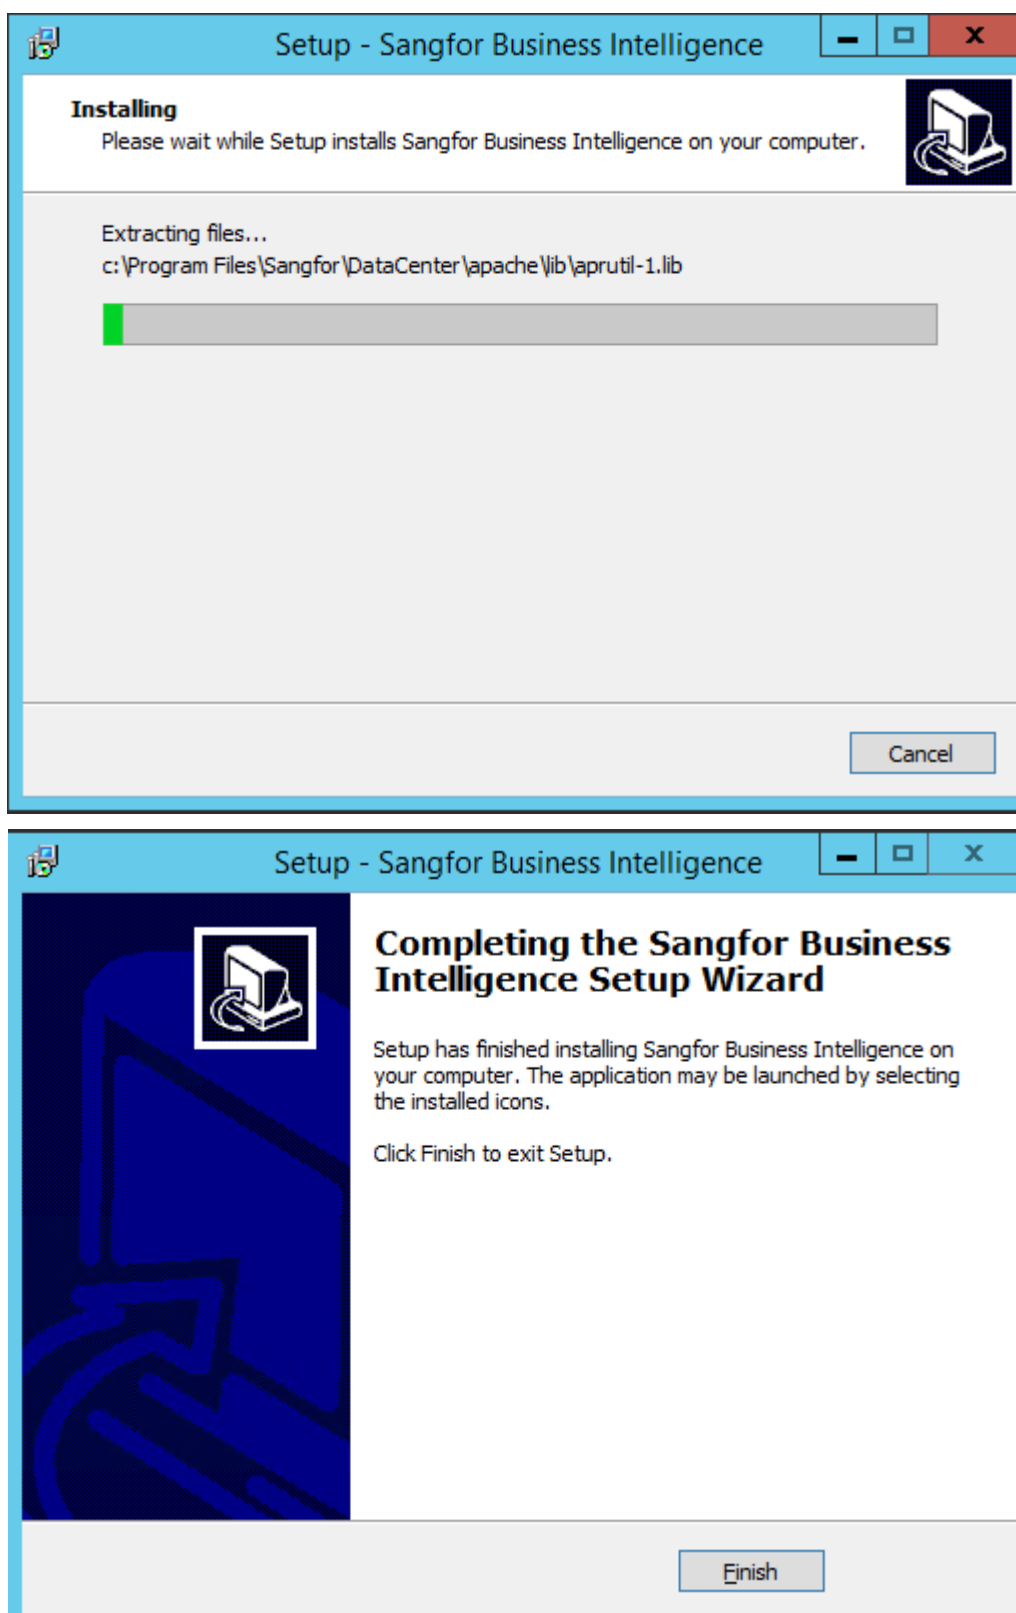

Ready to Install

Setup is now ready to begin installing Sangfor Business Intelligence on your computer.

Click Install to continue with the installation.

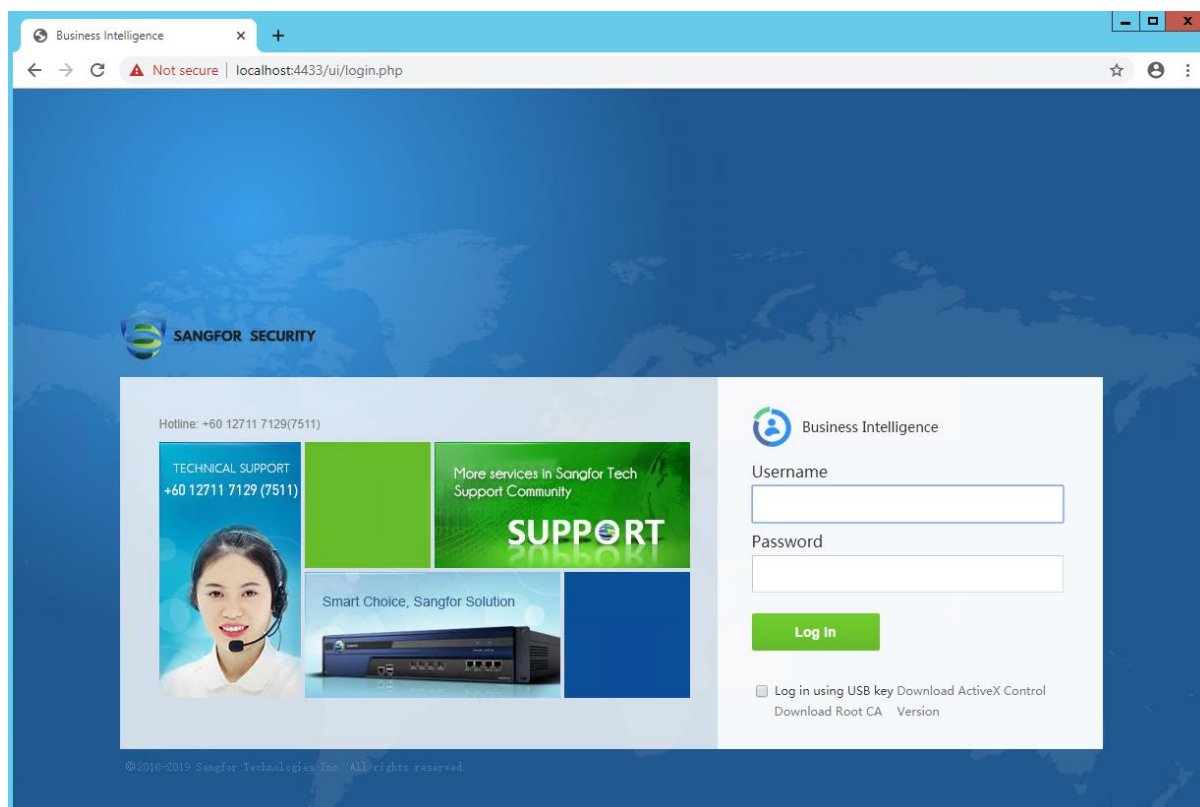

< Back Install Cancel

Click on “Finish“, the Business Intelligence upgrade is complete.

3 Testing Result

We may perform the testing by insert “https://localhost:port“ , to check whether the upgrade is successful or not. The diagram as blow.

4 Precautions

1. If the external data center is not 11.x version, then we should change the port number to 80 for the external data center web page before the upgrade.
2. After upgrade to 11.x version from non 11.x version, the previous log still available for checking but not for statistics.
3. After upgrade to 11.x version from non 11.x version, the data only can be view and check after perform indexed manually.
