

NGAF GeoLocation Blocking:

Go to Policies > Access Control > GeoLocation Blocking > Add.

The screenshot is as follows:

The screenshot displays the NGAF Platform 8.0.47 interface. The top navigation bar includes links for Home, SOC, Monitor, Policies (highlighted with a red box), Objects, Network, and System. On the left sidebar, the 'Policies' menu is expanded, showing 'Access Control' (which is further expanded to show 'Application Control', 'GeoLocation Blocking' (highlighted with a red box), and 'Local ACL'), and 'NAT' at the bottom. The main content area is titled 'GeoLocation Blocking' and features a toolbar with icons for '+ Add' (highlighted with a red box), 'Delete', 'Enable', 'Disable', 'Move To', 'Exclusion', 'Blocked IP Addresses', 'Change IP Location', and 'Location Lookup'. Below the toolbar is a table with the following columns: a checkbox, 'No.', 'Name', 'WAN Zone', 'Dst Network Object', 'Action', 'Country', and 'Status'. The table currently contains one row with a checked checkbox and empty values for the other fields.

<input checked="" type="checkbox"/>	No.	Name	WAN Zone	Dst Network Object	Action	Country	Status
<input checked="" type="checkbox"/>
