

Step 2. After Endpoint Secure is connected, configure an endpoint app control policy. Go to Policies > Access Control > Application Control to configure the policy.

Edit Endpoint App Control Policy ✕

Name:

Status: ☒ Enabled ☐ Disabled

Description:

Policy Group: Integration Policy Group

Tags:

Endpoints:

Applications:

Schedule: All week

Action: ☐ Allow ☒ Block

NGAF will push down the policy to Endpoint Secure immediately after you save the settings. Within 5 to 10 minutes, the selected applications will be blocked on all selected endpoints.

Name: Set the name of the endpoint app control policy.

Status: Set the policy as Enabled or Disabled.

Description: Set the description of the endpoint app control policy

Policy Group: By default, all endpoint app control policies will belong to the Integration Policy Group.

Tags: Select the policy tag. This parameter is optional and can be set for displaying a specified zone or filtering.

Endpoints: Select the endpoint's IP to be controlled.

Applications: Select the applications that are needed to control.

Schedule: By default, the policy will run all week.
