

Introducing Sangfor HCI/SCP 7.0.0

Powering Mission-Critical VMware Replacement

Rock-solid Stability to Safeguard Your Business Continuity

- ✓ Active-active metro storage cluster solution in single HCI cluster to achieve 0 data loss
- ✓ Array-based replication solution with external storage cluster (Available in October)
- ✓ Unlock Agentless Backups with Veeam 13.1 (Official verified by Veeam in December 2026)
- ✓ Unlock Agentless Backups with Cohesity NBU (Available in December 2026)
- ✓ Overload protection enabled in heavy load scenarios: restrict platform management services within controlled CPU resources to avoid resource contention with business VMs and eliminate unexpected service fluctuations.
- ✓ Support migrating virtual machines back to their original nodes automatically after platform firmware rolling hot upgrade.
- ✓ Support for SR-IOV VMs HA on nodes with the same network adapter.

Tier-3 Scenario Optimization: Unleash Breakthrough Storage Performance

- ✓ Support HCI to connect to external storage via NVMe over RoCEv2.
- ✓ Set Virtual Machine Disk Asynchronous I/O (AIO) to io_uring method, boosting 4K/8K random read and write performance by 10%-30%.
- ✓ Shared disk support SCSI -3 persistent reservation for WFSC/RHHA/SQL Server FCI business

Flexible Virtual Machine Capabilities for Your Customized Workloads

- ✓ Newly support the Thick Provision Lazy Zeroed disk allocation mode: combining the speed advantage of thin provisioning with full disk space reservation as thick provisioning.
- ✓ Create multiple disks for a single VM that can be mapped to different storage locations: e.g. one disk on virtual storage, another on external storage.
- ✓ Add brand new Turkish/Portuguese keyboard layouts for local operation convenience.

Upgraded Internationalization to Meet Global Compliance Requirements

- ✓ HCI/SCP now supports Japanese and Spanish language.

Your One-Stop Solution for Network Security & Cloud Computing

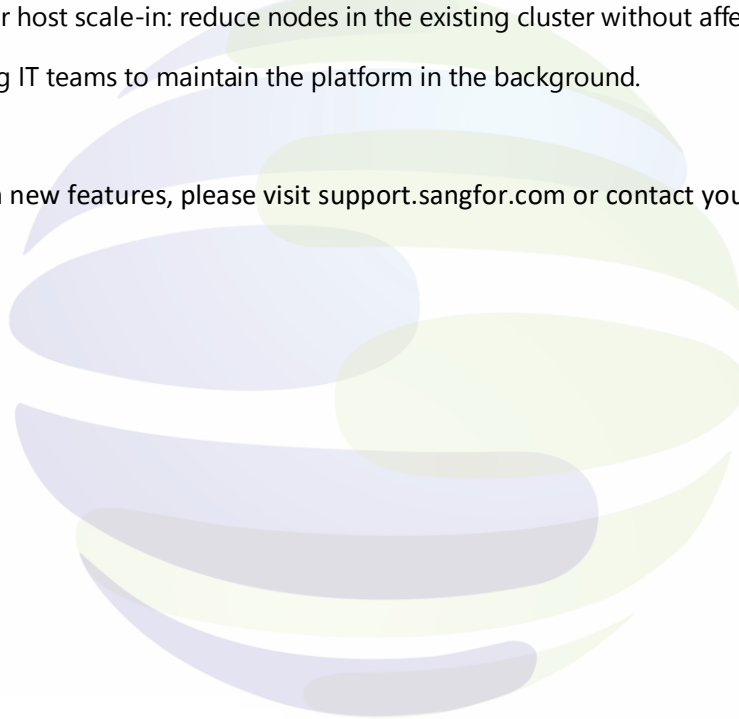

- ✓ New Brazil time zone added to SCP/HCI platform time zone list.
- ✓ Operation audit logs fully record operator, operation action, operation type, operation object, operation time, operation IP and operation description, compliant with GDPR log regulations.
- ✓ "administrador" as the administrator account for the Spanish Windows image.

More Practical Optimization for Smarter Management

- ✓ Significantly optimize SCP page response times
- ✓ ACL in Distributed Firewall and VPC Firewall supports IPv6.
- ✓ non-disruptive cluster host scale-in: reduce nodes in the existing cluster without affecting running services.
- ✓ Provide aCLI, allowing IT teams to maintain the platform in the background.
